

Rubric for the First Presentation

STUDENT/TEAM:

Project/Title:

TERM

Dimension		Points
Question (1 point)	The research question is clearly stated.	
Motivation (1 point)	The motivation is clearly stated.	
Data needed (1 point)	What type of data do you ideally need? This is clearly explained.	
Data available (1 point)	What type of data do you actually use? This is clearly explained.	
Econometric model (3 points)	What econometric model do you estimate? What are the dependent and independent variables? Do you use OLS or LDV models? Do you have any squared and interaction terms?	
Endogenous explanatory variables (2 points)	Are any of the endogenous variables endogenous? If so, why? Is it due to omitted variables?	

How could you address the endogeneity issue? (2 points)	What strategy can you employ to address this endogeneity? Why would that be valid?	
How did you address the endogeneity issue? (2 points)	What strategy do you actually employ to address this endogeneity? Why is that valid?	
Interpretation of coefficient estimates (2 points)	How do you interpret the coefficient estimates?	
Conclusion (3 points)	Based on your results, what conclusion do you arrive at?	
Future Research (2 points)	How can future research improve upon your work?	
Overall presentation (3 points)	Overall quality of presentation.	
Questions (2 points)	Please ask at least one question when you are in the audience.	
		Total Points (out of 25)
